

An Open Letter to Businesses

R073-au

Cited in the momentum of hundreds of thousands of Academic Research articles, the innate needs of human kind **may be the greatest discovery in natural law ever!** The innate needs are competence, relatedness and autonomy. Innate needs

“when satisfied lead to enhanced self-motivation and mental health, and when thwarted lead to diminished motivation and well-being.”

Loquate, a not for profit, discovered **Smart® values** that satisfy *innate needs* in 1977:

Smart® values *Relatedness- Doing that which is truly in the best interests of others.*

Competence- Attaining goals or other ends not necessarily preconceived as goals but which become goals once experienced.

Autonomy-Operating in an area of meaningful expansion for yourself, that is your interiorly preferred work.

On 10-17-19 in a letter to the founder of Loquate, innate needs co-author, Richard M. Ryan, sees “remarkable convergence” with Loquate’s nonprofit work, especially values.

Loquate offers businesses its Smart® values program as Scientific Momentum Activating Righteous Transformation.

Like sailors eating limes to prevent scurvy, Smart® values overcome scurvy of the human spirit which is diminished motivation and well-being. By activating righteous transformation, members tend toward happiness, or joy, and greater community.

We are to be related to all people to satisfy our innate need of relatedness like a hummingbird and a beanstalk. Are you?

A bean pod sprouts into a beanstalk in a healthy lifecycle. But without water, sunlight, and soil nutrients outside of the bean pod, the pod can't create energy, and the sprout withers and dies. In the healthy life cycle of the beanstalk, flowers emerge with pollen and nectar.

Hummingbirds have a long bill and can hover near flowers to eat its nectar. They do not eat pollen, but a great deal of pollen can be stuck to their tongues and bills. The beanstalk's pollinated flowers create new bean pods.

This life cycle of the beanstalk is similar to a person who satisfies innate needs. The beanstalk satisfies an innate need for competence by creating energy. The beanstalk satisfies its innate need for relatedness thru the hummingbird. And the beanstalk satisfies its innate need for autonomy by being unique, for example a beanstalk creating sugar snap peas.

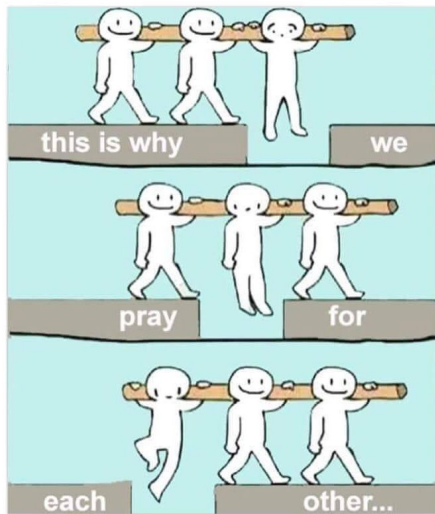

The humming bird is also similar to a person who satisfies their innate needs. The hummingbird satisfies its innate need for competence by eating nectar from flowers. The hummingbird satisfies its innate need for relatedness thru the beanstalk. The hummingbird satisfies its innate need for autonomy by being a unique kind of

hovering bird with a long beak to reach into flowers.

Man witnesses beauty in the beanstalk and the hummingbird. But man alone has free will to choose, or not, values that alone satisfy innate needs. Creatures are said to be instinctual. Natural law is all around us waiting to be witnessed and rightly chosen. In the beanstalk and the hummingbird, we can choose to give witness or not to a Great Spirit at work there and in our lives too.

The Smart® group is a sign, a sign of love. Have you ever noticed in a chaotic manmade world comes order, precisely at a moment needed most?

Where does this come from? Not so much a sign that you and I agree to call this or that as much as the irrefutable fact that the sign comes. Let us not argue in word as much as the fact that the sign does come. And when it does come, acknowledge it as "not from ourselves." It is intelligent. It does exist. Let us call it God, or Spirit, or That which you value the most for the common good. Let us use the words interchangeably. Because when we pray or meditate, we seek it. Chaos ends. Order resumes. Life has changed and we are astounded. That is Spirit.

If I pray to God in a Smart® group open to all in a corporation, that does not discriminate against an atheist. Therefore, an atheist may not discriminate against me. For if they do, they deny them self.

A human person is different from all other creatures in free will. When one chooses values according to the plan of the Great Spirit, or natural law from the Lord their maker, the human spirit thrives with the sign. In their interiorly preferred work is the sign. Happiness or joy and increased sense of community is the sign. The sign is also found in relatedness to all mankind exclusive of none. Members share their experience of the sign in Miracles First Hand. That great sign is unity for all.

Want to try this Smart® group enrichment? Corporations may offer an incentive for participation. Contact jeff@loquate.tv 773-621-0863.

Loquate is a ripple organization that touches others in ripples of intentional community building. Its core competence is community building in pulsating waves of good called domains. Domain Theory uniquely relies only on changing oneself, and can be replicated elsewhere to build community. Major charitable support comes from Corporate and individual sponsors who believe in its work in "unity for all." Helping another accomplish that which they value the most is the ripple effect.

Rising corporations too want happiness or joy for you and greater community for all their employees. The greater the community within the corporation, the higher the employee's perception of well-being coming from the corporation. Benefits are: less turnover, higher engagement (which leads to higher profitability according to Gallup polls), and a greater draw of the outside world to the corporation's offerings. As a percentage of your time per year the commitment to participate in a Smart® group is 0.4% (4/10ths of 1%).
